About me

I'm a **23-year**-old final-year engineering student specializing in technology, with experience spanning software engineering, data analytics, AI, and risk modeling.
I've completed **5 internships** in **Software Engineering**, **Predictive Maintenance AI**, and **Risk Modeling**, and held leadership roles including **Software Engineer at a Finance & Accounting SaaS**, Data Analyst at AIESEC International, and Team Leader at AIESEC Tunisia.

I also **co-founded a company** connecting students with international study opportunities, contributing to both **product development and business strategy.**

I hold **16 professional certifications** from leading technology companies, including **Microsoft, IBM, and SAP.**

EDUCATION

Information Technology Engineering Sep 2022 – Sep 2027
Ecole superieure privée d'ingénierie et de Technologies – ESPRIT

SKILLS

RISK MODELING MARKET RISK , CREDIT RISK , INSURANCE RISK , MONTE CARLO
Generative AI & LLM engineering REINFORCEMENT LEARNING , HARNESS ENGINEERING , VECTOR DATABASES
Software & Infrastructure PYTHON **,** JAVA , COBOL , C# , C , KUBERNETES , TERRAFORM , BASH SCRIPTING , CICD

EXPERIENCE

Risk Modeling Intern **Jul 2026 – Aug 2026**
Poulina Group Holding
- Developed a **Market Risk Engine** implementing **VaR**, **Expected Shortfall**, **Historical Simulation**, and **Monte Carlo Simulation** for portfolio risk measurement and stress testing using **Python**, **NumPy, Pandas, SciPy, and statistical modeling**.

Risk Modeling Intern **Jul 2026 – Aug 2026**
BNA – Banque Nationale Agricole
- *Developed a **Credit Risk Engine** implementing **PD, LGD, EAD, and Expected Credit Loss (ECL)** models aligned with **IFRS 9**, **using Python, Pandas, NumPy, Scikit-learn, Logistic Regression, and model validation techniques.***

Uvey ***Dec 2025 – Apr 2026***
- Developed **Java**-based microservices with **Quarkus** and contributing to **React frontend** development for a centralized and an automated **accounting and financial management software.**

Co-Founder **Nov 2025 – Current**
Edugate
- Led **product development and technology strategy** for the country's first platform connecting students with global universities, building the application with **Angular and Spring Boot**, and managing **PostgreSQL, Kubernetes, Docker, and CI/CD pipelines** while overseeing business operations.

Data Analyst **Aug 2025 – Dec 2025**
AIESEC international
- Analyzed, validated, and visualized **global organizational data** using **Google Sheets, Google Apps Script (JavaScript), and data automation**, developing automated reporting workflows and dashboards to support **KPI tracking,**

AI Engineer Intern **Jul 2025 – Aug 2025**
Discovery Intech
- Developed a scalable **AI predictive-maintenance system** using **Machine Learning, Time Series Analysis, and NLP** for failure prediction and root-cause analysis, deploying services with **FastAPI, Spring Boot, and PostgreSQL**.

Software Engineer Intern **Jul 2024 – Aug 2024**
Poulina Group Holding
- Implemented CQRS with .NET Core & C#, developed secure RESTful APIs and Built responsive web apps with Angular.

Team Leader **Nov 2022 – Jan 2025**
AIESEC In Tunisia
- Led a team managing international internships, optimized **CRM pipelines**, and shaped committee strategy .

Software Engineer Intern **Jul 2023 – Aug 2023**
Poulina Group Holding
- Developed a **reporting system** using **.NET Core, C#, REST APIs, and Angular .**
